

Case Study

The Scunthorpe and Goole NHS Trust Carer Unit

This unit was created as part of the refurbishment of existing facilities at the Scunthorpe Hospital. Established to offer both respite and long term care for the elderly of the South Humber and North Riding area, the Carer Unit provides the best possible care in tasteful and comfortable surroundings.

ROTALUX was the unique hospital bedlight chosen for the single and multiple occupancy rooms. Providing comfort and high quality lighting for both patients and staff, ROTALUX is both simple and flexible to use and enhances the high quality care offered by this unit.

Features of particular interest to the facilities and clinical team include:

- Attractive modern design complements room décor
- Soft golden light offers more 'homely' ambience
- 350° rotation - allows option of indirect lighting
- Full dimming via simple pull cord - patient controls own lit environment

- Easy clean design
- Simple demounting for off-site relamping
- 2 year product guarantee

David Westerman, Facilities Director
for Scunthorpe & Goole NHS Trust:

ROTALUX products are designed and manufactured at Martlesham Heath, Suffolk by Light Years Ahead Ltd.
